## **SNA Machinery has a new Warehouse in North America**

*Tracadie-Sheila, NB, September 17<sup>th</sup> 2007* - Since the announcement of the new Slootweg division, SNA Machinery, in November 2006, a building was purchased, renovated and organized. We now have the space we need to serve the industry with equipment and spare parts. The new building will have the following uses:

- Stock Electrical and Mechanical Spare parts for our equipment
- Stock conveyors and commonly used equipments
- Assemble some equipments on order
- Space for R&D projects
- Sales and engineering

Since 1988, Slootweg has entered the North American Market with Computerized Mixing Lines. Almost 20 years later, a North American Division was created, Slootweg North America (SNA) Machinery. Our warehouse is ready. The building, located in the heart of the North American Peat Industry, is located in an industrial park in New-Brunswick, Canada, at a walking distance from tow peat bogs.

SNA Machinery can offer the design and supply of a complete plant, a single new machine or the retrofit of used equipment. By combining our deep knowledge of the process with detailed knowledge of equipment, we have numerous examples of productivity improvement, therefore optimizing the Return of Investments for our clients. Here are some examples of products and services:

- Complete Automated Mixing Line
- Bagging and palletizing line
- Screening system
- Weighting and Coding System
- Plant Management and Performance Software

SNA is truly a North American supplier. In the past year alone, we have sold projects from Florida to the Canadian Prairies as well as from the Pacific Coast to the Atlantic Coast. These project ranges from a single machine to a complete factory as well as engineering services and performance improvement software's.

- 30 -

### **About Slootweg Machinery and Cube Automation:**

An expert in the field of automation for the natural resources industries and municipalities, Cube Automation is a firm comprised of qualified engineers with its head office in Northeastern New Brunswick. The expertise of Cube Automation is recognized in the peat moss industry, municipalities, the pulp and paper industry, sawmills and the mining industry.

Founded in the thirties, Slootweg Machinery is universally known for the development, sale, machining and installation of equipment for the peat industry in 15 countries.
